OWI RobotiKits Introduces 7 in 1 Solar Rechargeable Solar Transformers

OWI, Inc.®, a leading supplier of fun, educational RobotiKits™ has added the 7 in 1 Rechargeable Solar Transformers to their award-winning line of construction kits for all levels of experience.

This is an innovative solar science kit that encourages children to exercise their source of creativity and imagination. The 7 in 1 comes with all snap plastic parts (no screws, tools required), solar panel and accessories. It is easy to assemble the 7 different modules: 2 power charging stations and 5 different vehicles.

A full time fueling station is remarkable. The transforming rechargeable station has 2 output plugs; one for solar recharging and the other for battery recharging. Amazingly, the battery charging station can bring the selected unit to full power in about 5 seconds and the solar recharging station will fully recharge in approximately 120 seconds. The fun time – run time is approximately 50-80 seconds. The educational value is paramount, The 7 in1 Solar Rechargeable Solar Transformers allows the user to experience energy that can be recharged and stored in a power source and learn its principles and knowledge through assembly.

Similar to OWI's other mini solar kits... if you have sun, you have power. Enjoy five different vehicles: Solar Car, Concept Car, Bulldozer, Dump Truck, and Concept Racer.

So many choices... transforming, recharging, indoors, outdoors, creating, and building. Learning is fun!

Assembled dimensions: Solar Car (1.44"x1.73"x2.82"), Concept car (1.02"x1.73"x2.82"), Dump truck (1.48"x1.73"x3.11"), bulldozer (1.87"x1.74"x3.64"), Concept racer (1.02"x1.74"x4.18")

Assembly time: minutes

Suggested selling price: \$26.95 USD
